the critics who despair of the coming of imaginative charismatic leaders to replace the

so called manipulative caretakers of american corporations don't tell us much about what leadership actually is or for that matter what management is either now john p kotter who focused on why we have a leadership crisis in the leadership factor shows here with compelling evidence what leadership really means today why it is rarely associated with larger than life charismatics precisely how it is different from management and yet why both good leadership and management are essential for business success especially for complex organizations operating in changing environments leadership kotter clearly demonstrates is for the most part not a god like figure transforming subordinates into superhumans but is in fact a process that creates change a process which often involves hundreds or even thousands of little acts of leadership orchestrated by people who have the profound insight to realize this building on his landmark study of 15 successful general managers kotter presents detailed accounts of how senior and middle managers in major corporations in close concert with colleagues and subordinates were able to create a leadership process that put into action hundreds of commonsense ideas and procedures that in combination with competent management produced extraordinary results this leadership turned ncr from a loser to a big winner in automated teller machines despite intense competition from ibm the same process at american express and sas helped businesses grow dramatically despite the fact that they were mature and commodity like kotter also shows how leadership turned around operations at p g and kodak produced huge business successes at pepsico arco and conagra and made the impossible occasionally happen at digital thousands of companies today are overmanaged and underled john kotter concludes not because managers lack charisma but because far too few executives have a clear understanding of what leadership is and what it can accomplish without such a vision even the most capable people have great difficulty trying to lead effectively and to create the cultures which will help others to lead

The book became the change bible for managers worldwide. Now in a sense of urgency, Kotter shines the spotlight on the crucial first step in his framework: creating a sense of urgency by getting people to actually see and feel the need for change. Why focus on urgency without it any change effort is doomed. Kotter reveals the insidious nature of complacency in all its forms and guises. john p kotter s leading change why transformation efforts fail is a classic of business literature and an example of high level analysis and evaluation in critical thinking analysis is all about the sequence and features of arguments when combined with evaluation of the strengths and weaknesses of an argument it provides the perfect basis for understanding corporate strategies and direction kotter applied these skills to his own experiences of coaching large and small businesses through changes aimed at improving their performance at its heart kotter s conclusion was simple unsuccessful transformations usually result from poor management decisions his view was that it was not enough for executives to have management skills strong leadership is required together with a clear process that can be used by all kinds of companies and organizations no matter what sector they are operating in looking at his own successes and failures alike kotter used his analytical skills to understand the sequence and features of relevant arguments before evaluating their strengths and distilling them down to identify common mistakes managers make when they try to implement change this practical application of two core critical thinking skills allowed him to develop an eight stage model for successful organizational transformation a model still widely used twenty years on
